

COUPLING FLOW, TRANSPORT AND REACTIONS USING DuMu^x AND REAKTORO

Bernd Flemisch

Keywords: Porous media, reactive transport, code coupling.

DuMu^x [1], a simulator for flow and transport processes in porous media, is coupled to Reaktoro [2], a computational framework for modeling chemically reactive processes. We describe the coupling on a conceptual as well as on a technical level. Several decoupling approaches to solve the resulting coupled problem are investigated by means of representative examples.
